

30kW¹

Automatic Home Generator Systems

Life's Luxuries, Uninterrupted.

Life doesn't stop when the power goes out. Our reliable 30kW¹ commercial grade home generator helps ensure that when the power goes out, all of life's luxuries are at your fingertips.

As you invest in your homes' amenities, you will appreciate the conveniences and rewards of owning the smartest generator system available designed with a streamlined footprint for easier installation that can reduce costs. Perfect for larger homes, the 30kW¹ home generator system manages whole house power with our patented Symphony[®] II Power Management System. Symphony[®] II is not only smarter, but easier to install making the whole process feel like a luxury as well.

Enjoy peace of mind with GE Generator Systems.
Brilliant Power.

To learn more, visit www.GEgenerators.com

Backed by 130 years of providing the latest technology, GE is committed to providing peace of mind to our customers. GE is one of the fastest growing home generator system brands in the country and provides a managed whole house solution to back up power. You already trust our brand for your appliances, now you can count on us to keep them running during an outage.

imagination at work

The longest, most comprehensive limited warranty in the industry. We offer a 5-year limited parts and labor warranty², so you can be assured of our commitment to quality.

Providing Peace of Mind

Automatic

The system continuously monitors your home's connection to utility power. The generator starts automatically when there is an outage and shuts down automatically when utility power is restored.

Premium Engine

Newly designed for standby applications, Briggs & Stratton® branded engines deliver improved reliability, performance and durability to meet your power demands during a power outage.

Power More for Less

Thanks to the customizable advanced computer controls of the Symphony® II Power Management System you have the flexibility to manage your whole house power, including up to 8 high-wattage appliances, with a smaller generator. This means less fuel consumption, less overall expense, and lower emissions.

One plus one equals one

Also available is our patented dual 200 Amp Transfer Switch. This first in class dual 200 Amp Transfer Switch combines two automatic transfer switches into one resulting in smaller, cleaner looking installation for your home. It's a convenient and affordable solution to manage whole house backup power for larger homes and businesses.

Available Accessories

1,000 Hour Maintenance kit helps you complete scheduled and preventative maintenance on your home generator. Designed specifically for your needs, each maintenance kit contains oil and air filters, an oil funnel, spark plug, timing belt and install accessories.

Cold Weather Kit ensures smooth operation in the winter months with the Cold Weather Kit for GE Generator Systems. The thermostatically controlled battery warmer and block heater activate as the temperature drops helping the standby generator operate in colder temperatures.

	076080 (CARB Compliant)
Fuel Type	Liquid Propane (LP) Gas, Natural Gas (NG)
GE Power Management	Symphony® II Power Management
Watts ¹ LP/NG	30,000
Engine Model	Briggs & Stratton®
Cooling System Type	Liquid Cooled
Operation	Fully Automatic
Voltage	120/240V AC
Amps (240V)	125 (LP Gas) 125 (NG)
Alternator	Brushless
Voltage Regulation	Automatic
Full Pressure Lubrication	Yes
Fuel Consumption* (at ½ Load)	115 ft ³ /hr, 3.2 gal/hr (LP Gas) 275 ft ³ /hr (NG)
Fuel Consumption* (at Full Load)	175 ft ³ /hr, 4.9 gal/hr (LP Gas) 275 ft ³ /hr, 415 cfh (NG)
Weekly Exerciser	Yes
Enclosure Technology	Galvanneal steel with corrosion resistant paint
Hour Meter	Yes
Overcrank Protection	Yes
Dimensions (LxWxH)	71"x32.3"x37"
Weight (Generator Only)	1049 lbs.
Warranty ²	5 Year
Transfer Switch Options	200 Amp Automatic Transfer Switch with Symphony® II Power Management
Basic Wireless Monitor	Yes, included
Included Extras	Each system includes an hour meter, battery charger, coolant and synthetic oil.

Get connected with your local dealer by visiting our website at www.GEgenerators.com or call 1-888-575-8226

Not for Prime Power or use where standby systems are legally required, for serious life safety or health hazards, or where lack of power hampers rescue of fire-fighting operations.

¹ This generator is rated in accordance with UL (Underwriters Laboratories) 2200 (stationary engine generator assemblies) and CSA (Canadian Standards Association) standard C22.2 No. 100-04 (motors and generators)

² Warranty details available at GEgenerators.com

³ Installations must strictly comply with all applicable codes, industry standards, laws, regulations and provided installation manual. Running engines give off carbon monoxide, an odorless, colorless, poisonous gas so it is important to keep exhaust gas away from any windows, doors, ventilation intakes or crawl spaces. The installation manual contains specific instructions related to generator placement in addition to NFPA 37, including the requirement that carbon monoxide detectors be installed and maintained in your home

⁴ Fuel consumption rates are estimated based on normal operating conditions at ½ load. Generator operation may be greatly affected by elevation and the cycling operation of multiple electrical appliances - fuel flow rates may vary depending on these factors.
